We connect people and technologies to make materials an intuitive experience. That`s what we want to work on together with you!

imat·易马
design & engineering

We are looking for a

Working student to support the digitalization of various laboratory processes (f/m/d)

Who we are?

imat-uve gmbh is an innovative, independent Development and Engineering service. We focus on products and component parts of the automotive interior. We design, develop, test and analyse the visual appearance, haptics, sounds and odour for the visions of the future. We have subsidiaries in Germany, China, USA, Mexico and South Africa besides our headquarter in Mönchengladbach.

As a **working student** for our laboratory you work in the core of our business. You help us to implement and optimize our digitalization process in this area.

This includes

- Familiarizing yourself with our laboratory processes and support your colleagues by creating software solutions
- Helping us to digitize our laboratory processes

Your profile

- You are interested in software solutions and their programming
- You are interested in automation and digitization projects
- English language skills

What do we offer?

- Agile and cross-cultural teams
- Support from experts in the field of software development (e.g., SCRUM master)
- Onsite workshop area and opportunity to work via remote access
- Different teams of software developers to share your experience
- Flat hierarchies
- An exciting insight into the world of the automotive industry
- Opportunity to start your career at imat after your studies

Are you up for a new challenge?
We should get to know each other.

Take off with us. We are looking forward to your job application!
